## Voltage-gated sodium channel blockers library from Otava

### Screening compounds for ion channel drug discovery

Dear Dr. ,

As a Director of Otava Ltd. I would like to offer you our new **Voltage-gated sodium channel blockers library (1668 compounds in total)** that was designed as a special screening library containing compounds with predetermined sodium channels blocking activity and selectivity. The compounds have been selected by pharmacophore screening of Otava Drug-like Green Collection against three ligand-based pharmacophore models. The models were built based on the known sodium channel blockers divided into three groups according to their structural features. Final selection of compounds has been made with fingerprint similarity to the reference ligands and pharmacophore models developed on their basis.

This library **comprises drug-like compounds only** and provides an excellent basis for epigenetic drug discovery.

**[Find out more...](#)**

---

Our price is **ONLY \$9.8** per 1mg (if more than 500 compounds are ordered)

#### Example price list in USD:

Num. of compounds ordered	1-20	21-50	51-100	101-500	501-1000
Price for 1mg	\$32.0	\$25.0	\$19.0	\$13.9	\$9.8

All compounds are in stock.

The library is for prompt delivery, cherry-picking is available.

---

Feel free to contact me if you are interested to obtain this library or if you need more information. I am looking forward to your reply.

Best regards,  
**Andriy Dmytrenko, MBA**  
**Director of Business Development and Marketing**
