## Solubility Fragment Library from Otava

Unique fragment compounds for FBDD **with assured solubility!**

As a Director of Otava Ltd. I would like to offer you our new [Solubility Fragment Library](#) containing **about 1,000** low-molecular "Rule-of-Three" compliant fragments with assured solubility in both DMSO (200 mM) and PBS buffer (1 mM). The reactive, pan-assay interference (PAINS) compounds were removed from the library. During the library design diversity filtering was used in order to provide chemical structure variety for your fragment screening project. Diversity of the library based on fingerprint distances is 0.89, number of clusters is 302 and number of singletons is 180.

This Solubility Fragment Library from Otava **comprises drug-like compounds only**. It is an excellent source of high quality fragments for your FBDD project.

[Find out more...](#)

---

Our price is **ONLY \$7.7** per 1mg (if more than 1,000 compounds are ordered)

### Example price list in USD:

Num. of compounds ordered	1-20	21-50	51-100	101-500	501-1000	more than 1000
Price for 1mg	\$32.0	\$25.0	\$19.0	\$13.9	\$9.8	\$7.7

All compounds are in stock.

The library is for prompt delivery, cherry-picking is available.

---

Feel free to contact me if you are interested to obtain this library or if you need more information. I am looking forward to your reply.

Best regards,  
**Andriy Dmytrenko, MBA**
