
Glucocorticoid Receptor Antagonist Library from OTAVA

Screening compounds for **Glucocorticoid Receptor binding**

OTAVA offers you our **Glucocorticoid Receptor Antagonist Library (1,100 compounds in total)**, which has been designed with receptor-based virtual screening using all available crystal structures of glucocorticoid receptor complexed with known antagonists (12 structures in total). The complexes have been superposed and divided into three groups by structural similarity. On the base of these groups, three different structural models were developed and then used to dock OTAVA's Drug-like Green Collection. The models were validated with reference set of 1000 compounds obtained from ChEMBL.

This library comprises **drug-like compounds only**.

[Find out more...](#)

**All compounds are in stock.
The library is for prompt delivery, cherry-picking is available.**

Feel free to contact me if you are interested to obtain this library or if you need more information.

I am looking forward to your reply.

Best regards,

Andriy Dmytrenko, MBA
Director of Business Development and Marketing
