

β -Turn Peptidomimetic Library – New PPI Focused Library from OTAVA

Small peptide-like compounds for drug discovery

As a Director of Otava Ltd., I would like to offer you our new [\$\beta\$ -Turn Peptidomimetic Library \(1,645 compounds in total\)](#) that has been designed as a special screening library containing synthetic compounds which mimic β -turns of proteins. This library is intended for **research and drug discovery projects focused on protein-protein interactions**.

The β -Turn Peptidomimetic Library was prepared with two selection procedures and diversity clustering. **The first selection** was made using pharmacophore screening where the pharmacophore model was based on real β -turn structures. **The second selection** was performed using similarity search to already known scaffolds of β -turn peptidomimetics such as pentameric and hexameric cycle scaffolds, bicyclic scaffolds and others.

Compounds with reactive groups and compounds containing any atom different to O, N, C, H, Br, I, Cl, F, P or S **were removed** from the library.

[Find out more...](#)

Our price is **ONLY \$6.8** per 1mg (if 1,000+ compounds are ordered)

Example price list in USD:

Qty/ number	1- 10	11- 20	21- 50	51- 100	101- 500	501- 1000	1001- 5000
1 mg	\$38.3	\$32.7	\$21.5	\$19.4	\$12.2	\$9.5	\$6.8

We offer **15% Academic Discount** for this focused library until Dec 31, 2013

All compounds are in stock, cherry-picking is available.

The library (DB, SD, XLS, PDF format) as well as the price-list is available [on request](#)

Feel free to contact me if you are interested to obtain this library or if you need more information. I am looking forward to your reply.

Best regards,
Andriy Dmytrenko, MBA
Director of Business Development and Marketing
