## Screening Collection from OTAVA

### 2 600 000 novel tangible compounds

OTAVA offers innovative screening collection comprising 2 600 000 novel tangible compounds, which are not available from other companies. The compounds ordered from this collection could be individually synthesized and delivered within 4 weeks.

Our fixed prices (\$199 for 1-50 mg of the sample) would allow you to get new compounds and to stay on budget.

Focusing this compounds' collection towards your specific molecular target is also available.
