

Nuclear Estrogen Receptor Targeted Libraries from OTAVA

Screening compounds for **drug discovery projects related with ERs**

I would like to offer you Nuclear Estrogen Receptor Targeted Libraries (ER α Agonists, ER α Antagonists, ER β Agonists, ER β Antagonists, ER α /ER β Agonists, ER α /ER β Antagonists). These special sets of compounds (2874 in total) have been carefully designed with combined approach that includes application of pharmacophore screening and Bayesian modeling. All compounds are in stock. The libraries are for prompt delivery, cherry-picking is available.

Find out more...

See also all our Nuclear Receptor Targeted Libraries

Feel free to contact me if you are interested to obtain this library or if you need more information. I am looking forward to your reply.

Best regards,
Andriy Dmytrenko, MBA
Director of Business Development and Marketing
