

Nicotinic Acetylcholine Receptor Targeted Library from OTAVA

Screening compounds for insecticide discovery

I would like to offer you [Nicotinic Acetylcholine Receptor \(nAChR\) Targeted Library](#). It is a special screening collection containing compounds with predicted activity against nAChR which is one of the major target for insecticide action. It has been carefully designed with cross of modeling techniques - pharmacophore screening combined with QSAR and Bayesian modeling. The library provides an excellent basis for insecticide discovery projects. All compounds are in stock, cherry-picking is available.

Thank you for your consideration.

Feel free to contact me if you are interested to obtain this library or if you need more information.

I am looking forward to your reply.

Best regards,

Andriy Dmytrenko, MBA

Director of Business Development and Marketing
