

Calcium channel blocker focused library from Otava

Screening compounds for **antihypertensive drug discovery**

As a Director of Otava Ltd. I would like to offer you our new **Calcium channel blocker library (1262 compounds in total)** that was designed as a special screening library containing compounds with predicted calcium channels blocking activity and selectivity. The compounds have been selected by pharmacophore screening of Otava Drug-like Green Collection against four ligand-based pharmacophore models. The models were built based on known calcium channel blockers.

The library comprises drug-like compounds only.
